

ECD Lab Project Proposal

Course Title

EL-301 Electronic Circuit Design

Instructor

Engr. Farhat Hussain Naqvi

Section

19B EL-A

Project Title

Overhead Water Tank System

Group Members

1. Ammar Bin Amir (19B-004-EE)
2. Khallil Rehman (19B-028-EE)
3. Maaz Siddiqui (19B-008-EE)
4. Syed Sohaib Shere (19B-024-EE)
5. Zain Ali (19B-020-EE)

Abstract

The purpose of this project is to implement the concepts of Electronic Circuit Design in our daily life. In this project, the overhead water tank can easily be operated manually through circuit board and through internet server. Furthermore, it will provide automatic switching which means there is no need of user to check the tank for the prevention of water overflow.
